Professional Summary

Workforce Management professional with 10+ years of experience designing, configuring, and operating WFM platforms in large contact center environments. Deep, hands-on expertise administering NICE IEX with proven capability across multiple systems and modules — forecasting, scheduling, intraday management, and reporting. I consult with stakeholders, implement platform configurations that match operational reality, and deliver training so client teams become self-sufficient.

Core Skills

- Workforce Management: Forecasting, Staffing Analysis, Capacity Planning, Scheduling, Real-Time Monitoring, Service Level Optimization
- Platform Expertise: NICE IEX (deep), Teleopti — platform configuration and migrations
- WFM Administration: Programs, Management Units, Queues, Skills, Distribution Roles, User Access, System Audits
- Operations & Leadership: Team Supervision, Performance Management, Training & Development, Root-Cause Analysis, Process Improvement
- Customer Service: Client Escalations, Issue Resolution, Customer Support, Technical Support, Relationship Management
- Technical Tools: Microsoft Excel (Advanced), NICE WFM/EEM, Ticketing Systems, Data Analysis, CRM Platforms, Database Management

Professional Experience

NICE IEX Administrator | Technical Support Specialist

iQor Philippines — Talisay, Negros Occidental | April 2022 – Present

- Administer NICE IEX systems across multiple global accounts; design and implement configuration changes for Programs, Management Units, Queues, Skills, and Distribution Roles to align the system with operational workflows.
- Resolved 100+ critical technical issues including ACD unknown statuses, forecasting errors, and system misconfigurations through systematic troubleshooting and vendor coordination.
- Conduct system audits (IEX, Picasso, CRO, CCR) to validate data integrity, Agent IDs, alignment, and skill assignments; document findings and implement remediation.
- Manage Service Requests and Incident tickets via Support Hub, achieving a 95%+ first-contact resolution rate for product issues and reducing downstream escalations.
- Lead and mentor administrative support staff; introduced process changes that reduced administrative errors by 30% and improved handoff quality.
- Act as primary escalation and technical liaison for client teams, facilitating stakeholder calls and delivering actionable fixes and recommendations.

Consulting & Implementation Highlights

- Delivered end-to-end platform configuration and onboarding for new programs, including skill/queue design, routing logic, forecasting settings, and report templates.
- Designed and delivered hands-on training for operations and WFM teams, producing practical job-aids and configuration documentation tailored to client environments.
- Identified underused platform capabilities and recommended configuration or training changes that improved operational self-sufficiency for client teams.

Workforce Supervisor — iQor Philippines

Talisay, Negros Occidental | April 2016 – April 2022

- Supervised WFM team managing workforce allocation for 500+ agents across multiple high-volume contact center operations.
- Optimized intraday staffing to achieve 30-minute accuracy targets and maintain service level objectives.
- Conducted root-cause analysis on forecast variances; implemented recommendations improving forecasting accuracy by 25%.
- Mentored 15+ WFM team members, achieving high performance and strong retention.

Real-Time Analyst — iQor Philippines

Dasmariñas, Cavite | September 2014 – April 2016

- Managed real-time workforce operations for high-volume contact center, ensuring optimal staffing throughout the day.
- Monitored and adjusted intraday forecasts based on business drivers and historical trends.
- Generated analytical reports identifying staffing optimization opportunities; implemented recommendations that produced 15% efficiency gains.

Client Support Analyst / Mobile RTA — Concur Technologies, Inc.

Pasay City, Philippines | June 2013 – August 2014

- Provided frontline technical support to enterprise customers, resolving Concur Travel product issues via CRM ticketing system with a high first-contact resolution rate.

Education

Information & Technology — Systems Technology Institute (STI), Ormoc — 2005
